

# Inspection**Apps**

Ticking the Boxes for Small Business

## Turn any kind of checklist into an iPhone app

With over 25 billion app downloads, with millions of different uses, it is certainly a cluttered marketplace.

Inspection Apps, a **Multi-Award Winning product**, has taken a small step to simplifying this cluttered marketplace by creating **one app** that can be used for **multiple checklist inspections** across countless industries. Inspection Apps is the mothership of apps, that provides a software solution for Agencies like Housing, Roads, Bridges, Energy, Property, Education, Councils, Building, Mining, OH&S, and so many more.

Traditionally, a business that is seeking an app (and database combination) from a developer for a specific purpose will pay upwards of \$50,000, and it will cost many months of development time.

With Inspection apps, each customer gets:

- A Tailored iPhone/iPad app with any number of Inspection types, and
- A nimble, Cloud-based Software-as-a-Service (SaaS) Web Application to store inspection data, photographs and produce PDF/Management reports, work orders, Directions, or any type of document.

The product is a fully customised, fully developed software solution, for a **few dollars per inspection**, and delivered **within a few days**.

The Cloud-Based SaaS manages inspections and client data, with full document management and email functionality. It is the intelligent SQL-based SaaS Solution that drives the app and provides a complete business solution.

Businesses achieve measurable **labour cost savings and fast turnaround times**, every time. Use of a mobile device simplifies information collection, and provides **automatic, wireless uploading. A PDF report, with embedded photos, can be produced in under 10 seconds!**

Inspection Apps is the answer.

# The Proposal

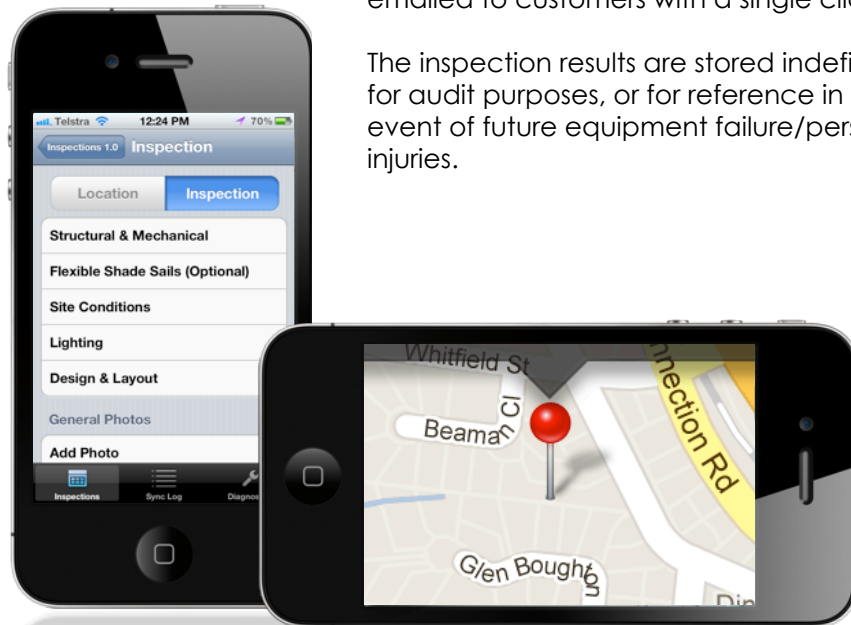

## Playground Inspections

This app is designed for Inspectors who carry out Quarterly/HalfYearly/Annual playground inspections in Australia.

It allows the inspector to collect data across a range of categories, so that defects and current condition can be noted.

It also automatically imports the data and photographs into a PDF report, that can be emailed to customers with a single click.

The inspection results are stored indefinitely for audit purposes, or for reference in the event of future equipment failure/personal injuries.

# The Process

View all of your inspections

Use the map screen to locate the property

Carry out the inspection

Describe and photograph Compliance issues.

Refer to diagrams, legislation or reference material

Wirelessly upload data to your computer

Data is automatically uploaded from your iPhone, and is neatly stored on your computer.

## Structural & Mechanical

Question	Result						
Are structural components free from damage, rust and corrosion?	No <a href="#">Edit »</a>						
<table border="1"> <thead> <tr> <th>Explanation</th> <th>Rectification Method</th> <th>Images</th> </tr> </thead> <tbody> <tr> <td>Cross rails are rusting</td> <td>Replace rails</td> <td></td> </tr> </tbody> </table>	Explanation	Rectification Method	Images	Cross rails are rusting	Replace rails		
Explanation	Rectification Method	Images					
Cross rails are rusting	Replace rails						
Are protective coatings and equipment surfaces free from damage and wear?	Yes <a href="#">Edit »</a>						
Are rails, bolts and other protruding sharp objects covered with end caps?	Yes <a href="#">Edit »</a>						
Are moving parts and bearings well greased/lubricated?	Yes <a href="#">Edit »</a>						
Are bolts, nuts, screws and fastening pins in place and secure?	No <a href="#">Edit »</a>						
<table border="1"> <thead> <tr> <th>Explanation</th> <th>Rectification Method</th> <th>Images</th> </tr> </thead> <tbody> <tr> <td>Handrail is detached due to missing nut</td> <td>Replace component and nut</td> <td></td> </tr> </tbody> </table>	Explanation	Rectification Method	Images	Handrail is detached due to missing nut	Replace component and nut		
Explanation	Rectification Method	Images					
Handrail is detached due to missing nut	Replace component and nut						
Are handrails and steps free from damage and are slip resistant?	No <a href="#">Edit »</a>						
<table border="1"> <thead> <tr> <th>Explanation</th> <th>Rectification Method</th> <th>Images</th> </tr> </thead> <tbody> <tr> <td>Ply platform is buckled</td> <td>Replace platform</td> <td></td> </tr> </tbody> </table>	Explanation	Rectification Method	Images	Ply platform is buckled	Replace platform		
Explanation	Rectification Method	Images					
Ply platform is buckled	Replace platform						

# Reporting

With Click-Once technology, professional reports are produced which include the inspection data, customised to how you want it.

## Playground Inspection Report

Report commissioned by: John Smith  
Property Address: 1 Anywhere Street, Anywhere ACT 2000  
Date of inspection: 1st January 2012

6 March 2013

## Playground & Shade Sail Inspection Report

Owner: John Citizen  
Address: 10 Mulgrave Road Cairns, QLD, 4870  
Inspection date: 1 March 2013

### Posts

Post type	Steel
Post Size	125mm SHS
Post Finish	Hot Dipped Gal
Post Condition	2 = Good
Maximum Sail Attachment Height (in m)	5.0
Footing observations	Not exposed
Number of posts	3 x 165 8 x 114

### Sails

Sail Type	Shade
Fabric Type	Rainbow Extreme 32
Number of Sails	3

Sail 1 Colour: Orange  
Sail 2 Colour: Green  
Sail 3 Colour: Purple  
Comments: Two other sails Blue Z16 Blue Polyfab

Edge Trimming  
Attachment points  
Shade size(s)

Sail(s) Condition

Seat Belt  
D rings  
4 point shape  
Length 1: 4.5  
Length 2: 5.2  
Length 3: 6.4  
Length 4: 5  
Length 5:

4 = Schedule Work  
Comments: Tear Polyfab  
Repair or Replace: Repair  
Estimate Cost: 255

Comments (Optional)

Z16 sails are new and good condition.

Polyfab is old and fair condition.

Hole in Polyfab

Yes, and Photographed

### General

Plan prepared?

Is an Engineer Inspection required?  
General comments

Yes  
114 posts may be undersized

We take this opportunity to thank you for your instructions, and we look forward to being of service to you again.

Your Faithfully,

Pricing

There are two components to our SME pricing structure.

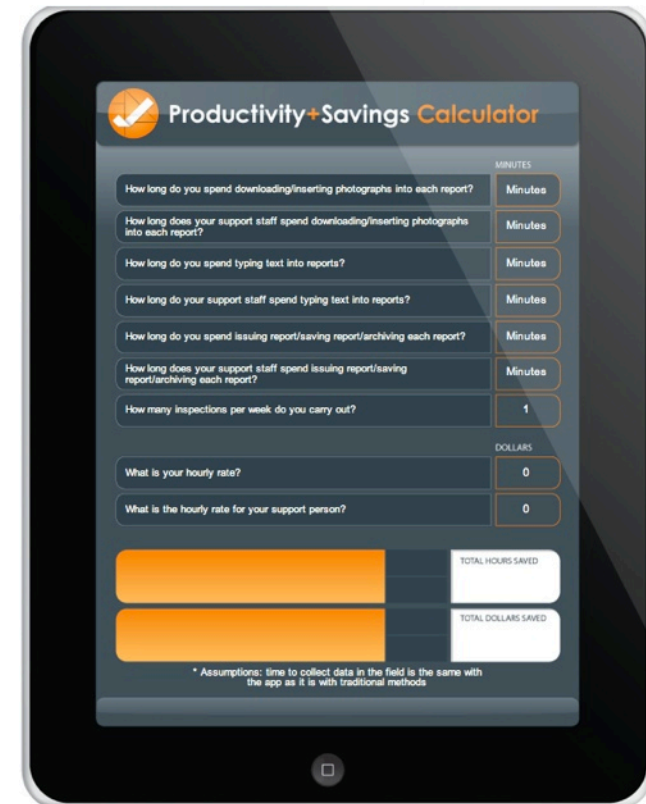

Firstly, a Consulting fee applies for determining needs, customising an iPhone app, and preparing PDF reports, forms and templates for your use. The Consulting fee depends upon the complexity of the tasks, and number of reports required, but the average price is under \$3,000 plus GST.

Secondly, a Subscription fee applies which is paid per month. The price depends on the number of monthly inspections and data requirements. SME Clients that use simple checklists with low data requirements have pricing starting from \$55 per month, for up to 25 inspections (or \$2 per inspection).

Sounds Affordable? It is!

But, just to reinforce that thinking, try completing this calculator to determine just how much you will save in time and cost by using Inspection Apps.

# Benefits to you

Price, savings and productivity gains are important financial considerations, but also consider these benefits:

-  Being able to issue reports to your customers within minutes (rather than hours or days), will give you satisfied customers and competitive advantage.
-  Issuing Professional looking reports equals satisfied customers and competitive advantage.
-  Having systems that ensure that all of your inspections and reports are Quality Assured will give you satisfied customers and competitive advantage.
-  Having more time due to reduced reporting/administration, means that you have your nights/weekends back, or you can do more inspections.

All of this means more income in your pocket for less work.

Inspection Apps, Making Workflow Easier!

## More Benefits

There are stand-alone apps in iTunes. Why choose Inspection Apps?

Yes, there are many stand alone apps in iTunes that are either free or only cost a few dollars, and you might even find one that nearly fits your purpose. But consider this:

- ✓ With Inspection Apps, you control the Checklist Questions for all of your field staff, which introduces **Quality Assurance**. Stand-alone apps allow the questions to be changed by each user.
- ✓ With Inspection Apps, **any report layout and format** can be created to match your style, rather than relying on what a stand-alone app provides.
- ✓ With Inspection Apps, a permanent record of all of **your inspections is stored on your database** that only you have access too.
- ✓ Your database can be modified to provide **“Management reports”**, and other features like **“Automatic invoicing”**, **“Automatic quoting”**, **“Multiple job types”** and **“Any number of users”**. Stand alone apps cant do that.

All of this means consistent quality, and a powerful IT /app platform.
