# InspectionApps

Ticking the Boxes for Small Business

# Turn any kind of checklist into an iPhone app

With over 25 billion app downloads, with millions of different uses, it is certainly a cluttered marketplace. **Inspection Apps** has taken a small step to simplifying this cluttered marketplace by creating one app that can be used for multiple checklist inspections across countless industries. Inspection Apps is the **mothership of apps**, that provides a software solution for Business, Government, Council, Real Estate, Building Inspectors, Mining, OH&S inspectors, and so many more.

With Inspection apps, each customer gets:

- A workflow optimised, business-rule-savvy, **iPhone app** with any number of job types, and

- A nimble, Cloud-based Software as a Service (SaaS) Web Application to store inspection data, photographs and produce PDF reports, that is customisable to any level.

The **Cloud-Based SaaS** manages inspections and their client data, with full document management and email functionality. It is the intelligent SQL-based SaaS Solution that drives the app. Businesses achieve measurable labour cost savings and fast turnaround times, every time. Use of a mobile device simplifies information collection, and uploading. The combined SaaS solution and iPhone app increases productivity and guarantees consistent quality.

This product is available as an IT Platform & System on a Business-to-Business basis or a Business-to- Government basis, delivered through the private sector. The Technology is Patent Pending. To our knowledge, and following extensive searching, this product is a **world-first design**.

A fully customised, fully developed and tested software solution, for a **few dollars per inspection**, and delivered within a few days. Other solutions can cost tens of thousands of dollars, and many months of development time. **Inspection Apps is the answer**.

## Traffic Management Inspections

This app is designed for Traffic Managers in Australia.

It allows the Traffic Controller or Field Auditor to collect data across a range of categories, and describe & photograph compliant and non-compliant features.
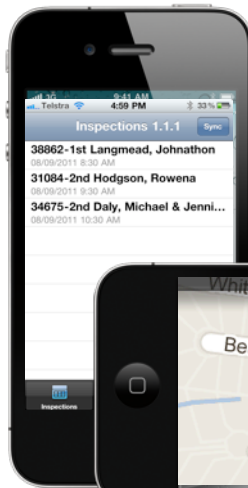

It also automatically imports that data and photographs into a PDF report, that can be emailed to the Customer with a single click, or retained on file for audit purposes.

|---|---|---|
| Traffic cones correctly spaced and visible to approaching traffic | Yes | Edit » |
| Is Traffic control position including escape route compliant? | Yes | Edit » |
| Is Method used to stop traffic (hand signals and stop/slow bat) compliant? | Yes | Edit » |
| Traffic and site awareness | Yes | Edit » |
| Position of traffic control vehicle compliant? | Yes | Edit » |
| Correct two-way radio procedures followed | Yes | Edit » |
| Speed reduction in compliance with site safety requirements? | Yes | Edit » |
| Site specific risk assessment and client inductions completed? | Yes | Edit » |
| Site signage audit completed? | Yes | Edit » |
| Pedestrian and cycle provision provided at the work site | Yes | Edit » |
| End road work and speed reinstatement signage installed? | Yes | Edit » |
| Meets company dress standards? | Yes | Edit » |
| Wearing appropriate day time/night time PPE? | Yes | Edit » |
| Communicates with work site personnel, TCs and the public? | Yes | Edit » |

Indicative Screen Grab (Individual databases will display customised information)

**Inspection**Apps

With Click-Once technology, professional reports are produced which include the inspection data, customised to how you want it.

# There are two components to our pricing structure.

Firstly, a Consulting fee applies for determining your needs, customising your iPhone app, and preparing reports, forms and templates for your use. The Consulting fee depends upon the complexity of the tasks, and number of reports required, but the average price is $1,980 plus GST.

Secondly, a Subscription fee applies which is paid per month. The price depends on the numbers of monthly inspections, starting from $55 per month, for up to 25 inspections (or $2 per inspection).

### Sounds Affordable? It is!

But, just to reinforce that thinking, try completing this calculator to determine just how much you will save in time and cost by using Inspection Apps.

Price, savings and
productivity gains are
important financial
considerations,
but also consider
these benefits:

✓ Being able to issue reports to your customers within minutes (rather than hours or days), will give you satisfied customers and competitive advantage.

✓ Issuing Professional looking reports equals satisfied customers and competitive advantage.

✓ Having systems that ensure that all of your inspections and reports are Quality Assured will give you satisfied customers and competitive advantage.

✓ Having more time due to reduced reporting/administration, means that you have your nights/weekends back, or you can do more inspections.

All of this means more income in your pocket for less work.

**Inspection**Apps

There are stand-alone apps in iTunes. Why choose Inspection Apps?

Yes, there are many stand alone apps in iTunes that are either free or only cost a few dollars, and you might even find one that nearly fits your purpose. But consider this:

With Inspection Apps, you control the Checklist Questions for all of your field staff, which introduces **Quality Assurance**. Stand-alone apps allow the questions to be changed by each user.

With Inspection Apps, **any report layout and format** can be created to match your style, rather than relying on what a stand-alone app provides.

With Inspection Apps, a permanent record of all of **your inspections is stored on your database** that only you have access too.

Your database can be modified to provide **"Management reports"**, and other features like **"Automatic invoicing"**, **"Automatic quoting"**, **"Multiple job types"** and **"Any number of users"**. Stand alone apps cant do that.

All of this means consistent quality, and a powerful IT /app platform.
