Ticking the Boxes for Small Business

## Turn any kind of checklist into an iPhone app

With over 25 billion app downloads, with millions of different uses, it is certainly a cluttered marketplace.

Inspection Apps, a **Multi-Award Winning product**, has taken a small step to simplifying this cluttered marketplace by creating **one app** that can be used for **multiple checklist inspections** across countless industries. Inspection Apps is the mothership of apps, that provides a software solution for Business, Government, Councils, Real Estate, Building Inspectors, Mining, OH&S inspectors, and so many more.

Traditionally, a business that is seeking an app (and database combination) from a developer for a specific purpose will pay upwards of \$50,000, and it will cost many months of development time.

With Inspection apps, each customer gets:

- A workflow optimised, business-rule-savvy, iPhone/iPad app with any number of Inspection types, and
- A nimble, Cloud-based Software-as-a-Service (SaaS) Web Application to store inspection data, photographs and produce PDF reports, that is customisable to any report template style.

The product is a fully customised, fully developed software solution, for a **couple of dollars per inspection**, and delivered **within a few days**.

The Cloud-Based SaaS manages inspections and client data, with full document management and email functionality. It is the intelligent SQL-based SaaS Solution that drives the app and provides a complete business solution.

Businesses achieve measurable **labour cost savings and fast turnaround times**, every time. Use of a mobile device simplifies information collection, and provides **automatic, wireless uploading**. **A PDF report, with embedded photos, can be produced in under 10 seconds!**

Inspection Apps is the answer.

# The Proposal

## Elevator Inspections

This app is designed for Elevator Inspections in Australia.

It allows the Inspector/Technician to collect data across a range of categories, describe & photograph defects and to summarise solutions for rectification.

It also automatically imports that data and photographs of the defects into a PDF report, that can be emailed to the Building owner with a single click.

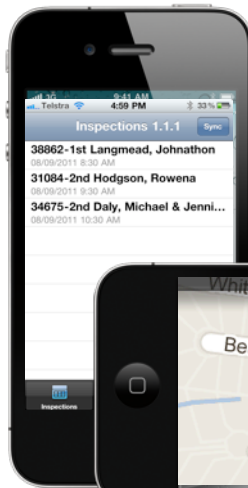

The app can also be easily adapted for escalators & moving walkways.

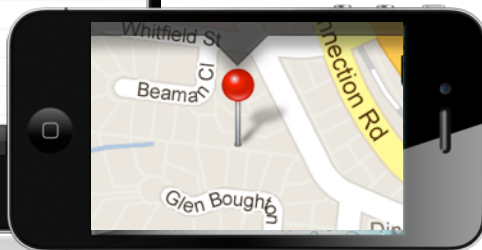

# The Process

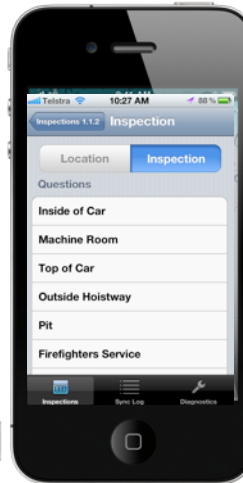

# App Design

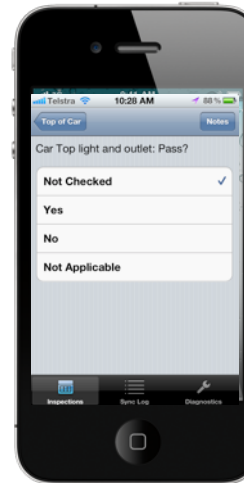

View all of your inspections

Use the map screen to locate the property

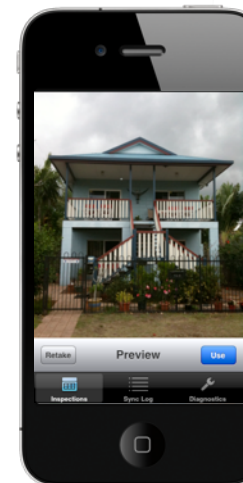

Carry out the inspection

Describe and photograph defects.

Refer to diagrams, legislation or reference material

Wirelessly upload data to your computer

# Database Design

Data is automatically uploaded from your iPhone,  
and is neatly stored on your computer.

## Electrical Safety

Question			Result	
Are Safety switches installed?			No	<a href="#">Edit »</a>
Explanation	Rectification Method	Images		
No safety switches exist	Install safety switches as a priority			
Are Safety switches tested every 6 months and are tests recorded?			Not Applicable	<a href="#">Edit »</a>
Is the workplace free of double adaptors?			Yes	<a href="#">Edit »</a>
Is all portable equipment tested and tagged?			Not Applicable	<a href="#">Edit »</a>
Is the site free of broken plugs, sockets and switches?			Yes	<a href="#">Edit »</a>
Is the site free of power leads across walkways?			Yes	<a href="#">Edit »</a>
Are all power leads free of damage and fraying?			Not Applicable	<a href="#">Edit »</a>
Are all power leads not "strained"?			Not Applicable	<a href="#">Edit »</a>
Are portable power tools in good condition?			Not Applicable	<a href="#">Edit »</a>
Are emergency shut down procedures in place?			Not Applicable	<a href="#">Edit »</a>

## First Aid

Question			Result	
Are all cabinets and contents clean and orderly?			Yes	<a href="#">Edit »</a>
Are contents regularly checked?			Yes	<a href="#">Edit »</a>
Are all contents within their expiry dates?			Yes	<a href="#">Edit »</a>
Are cabinets clearly labelled?			Yes	<a href="#">Edit »</a>
Is there easy access to cabinets?			Yes	<a href="#">Edit »</a>
Are employees aware of the location of the first aid cabinet?			Yes	<a href="#">Edit »</a>
Are first aid officers accessible?			Yes	<a href="#">Edit »</a>
Are emergency numbers displayed?			Yes	<a href="#">Edit »</a>

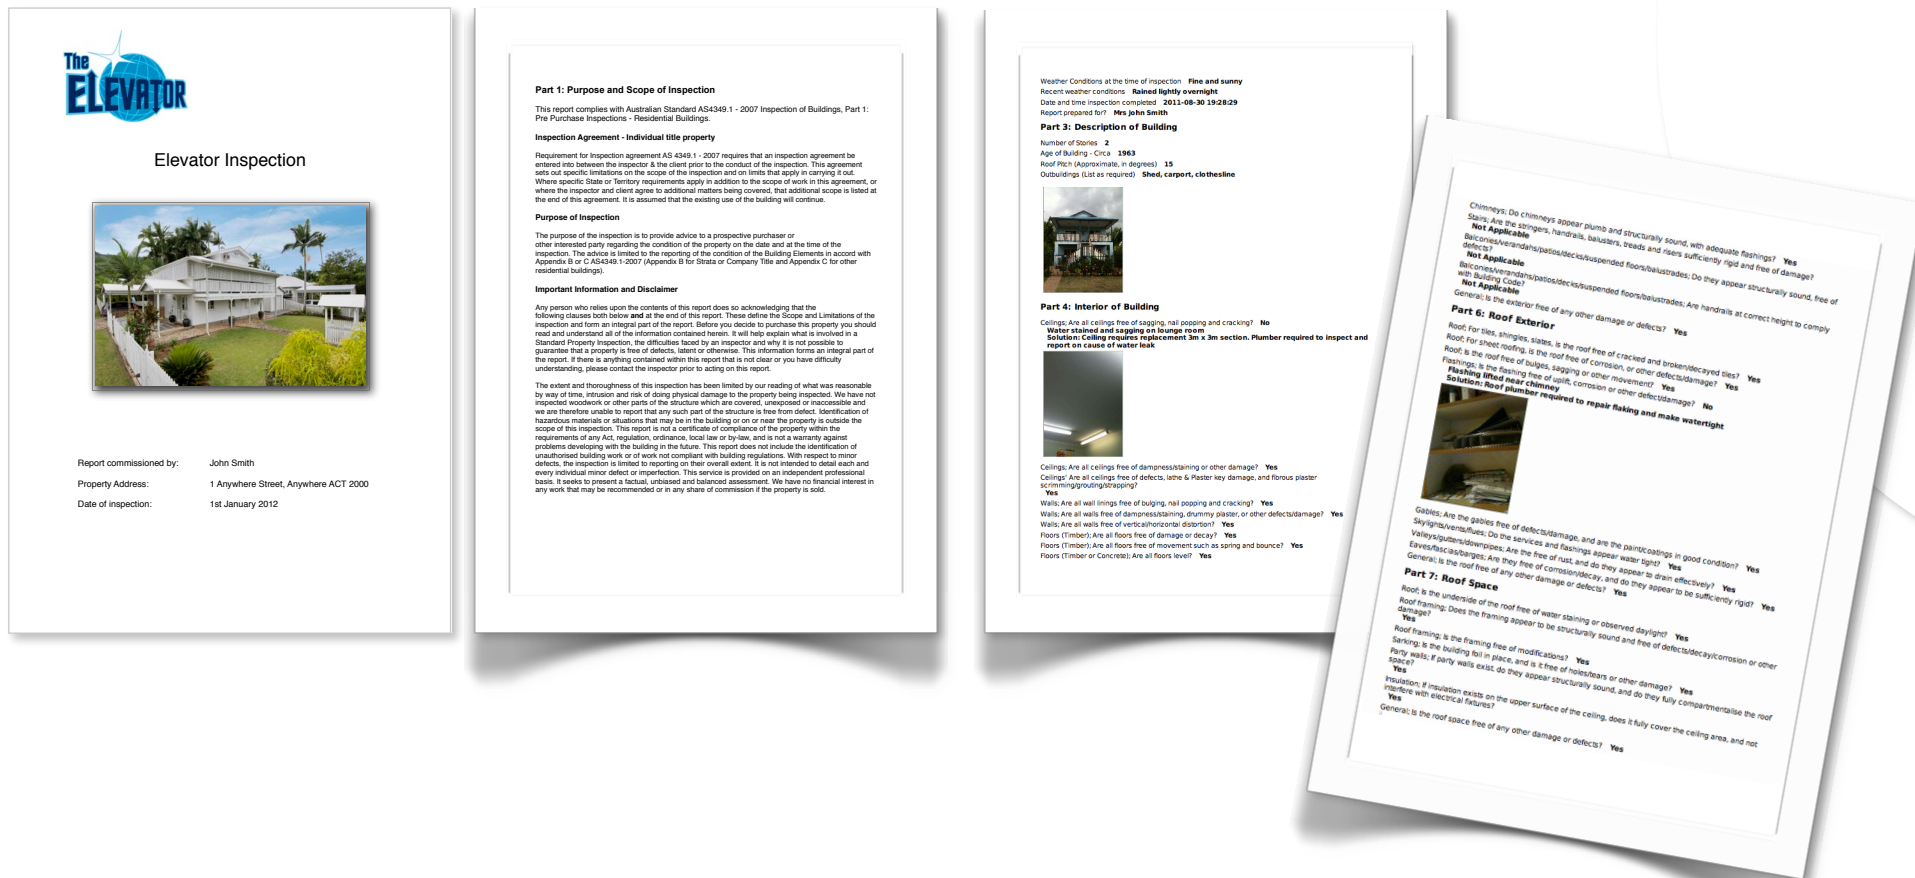

Indicative Screen Grab (Individual databases will display customised information)

# Reporting

With Click-Once technology, professional reports are produced which include the inspection data, customised to how you want it.

### There are two components to our pricing structure.

Firstly, a Consulting fee applies for determining your needs, customising your iPhone app, and preparing reports, forms and templates for your use. The Consulting fee depends upon the complexity of the tasks, and number of reports required, but the average price is \$1,980 plus GST.

Secondly, a Subscription fee applies which is paid per month. The price depends on the numbers of monthly inspections, starting from \$55 per month, for up to 25 inspections (or \$2 per inspection).

#### Sounds Affordable? It is!

But, just to reinforce that thinking, try completing this calculator to determine just how much you will save in time and cost by using Inspection Apps.

[Click here](#) to go to our online calculator

The screenshot shows a tablet displaying the 'Productivity+Savings Calculator' app. The app has a dark blue header with a white checkmark icon and the title. Below the header, there are several input fields for time in minutes and dollars. The fields are: 'How long do you spend downloading/inserting photographs into each report?' (Minutes), 'How long does your support staff spend downloading/inserting photographs into each report?' (Minutes), 'How long do you spend typing text into reports?' (Minutes), 'How long do your support staff spend typing text into reports?' (Minutes), 'How long do you spend issuing report/saving report/archiving each report?' (Minutes), 'How long does your support staff spend issuing report/saving report/archiving each report?' (Minutes), 'How many inspections per week do you carry out?' (1), 'What is your hourly rate?' (Dollars, 0), and 'What is the hourly rate for your support person?' (Dollars, 0). At the bottom, there are two orange buttons labeled 'TOTAL HOURS SAVED' and 'TOTAL DOLLARS SAVED'. A small disclaimer at the bottom reads: '\* Assumptions: time to collect data in the field is the same with the app as it is with traditional methods'.

## Benefits to you

Price, savings and productivity gains are important financial considerations, but also consider these benefits:

- ✓ Being able to issue reports to your customers within minutes (rather than hours or days), will give you satisfied customers and competitive advantage.
- ✓ Issuing Professional looking reports equals satisfied customers and competitive advantage.
- ✓ Having systems that ensure that all of your inspections and reports are Quality Assured will give you satisfied customers and competitive advantage.
- ✓ Having more time due to reduced reporting/administration, means that you have your nights/weekends back, or you can do more inspections.

All of this means more income in your pocket for less work.

Inspection Apps, Making Workflow Easier!

## More Benefits

There are stand-alone apps in iTunes.

Why choose  
Inspection Apps?

Yes, there are many stand alone apps in iTunes that are either free or only cost a few dollars, and you might even find one that nearly fits your purpose. But consider this:

With Inspection Apps, you control the Checklist Questions for all of your field staff, which introduces **Quality Assurance**. Stand-alone apps allow the questions to be changed by each user.

With Inspection Apps, **any report layout and format** can be created to match your style, rather than relying on what a stand-alone app provides.

With Inspection Apps, a permanent record of all of **your inspections is stored on your database** that only you have access too.

Your database can be modified to provide **“Management reports”**, and other features like **“Automatic invoicing”**, **“Automatic quoting”**, **“Multiple job types”** and **“Any number of users”**. Stand alone apps cant do that.

All of this means consistent quality, and a powerful IT /app platform.
